

Gaia Tomasello: Gaia Tomasello received her Ph.D. in theoretical chemistry at the University of Bologna. She carried out postdoctoral research as an Alexander von Humboldt fellow at the department of Physics at Freie Universität (Berlin) in the field of excited state dynamics and then pursuing further her research activity at the Polytechnique Montréal studying the properties of conducting polymers for applications in nano- and bioelectronics. She joined Wiley in 2019 as peer review editor and works currently as Editor in Chief of the journal ***Advanced Electronic Materials*** and Deputy Editor of the journal the ***Physica Status Solidi A*** within the Department of Publishing Development under the Materials Scienced and Physics division with the office based in Berlin, Germany.
