

DOTTORATO DI RICERCA IN FISICA  
ANNO ACCADEMICO 2021/2022  
CICLO XXXVIII

---

## Introduction to Medical Physics

2 CFU

### Teaching staff

**Nome Cognome** Pablo Cirrone

**Email:** pablo.cirrone@INFN.it

**Office:** +39 095 542294

**Telephone:** +39 392 4065911

**Reception hours:** please, contact me by email.

### Program of the course:

1. Basic concepts in radiation dosimetry
  - a. Quantities for describing the interaction of ionizing radiation with matter
  - b. Charged-particle and radiation equilibria
2. The cavity theory
3. Dosimetry fundamentals
  - a. Concepts of radiation dosimetry and dosimeter
  - b. Interpretation of a dosimetric measure
  - c. General characteristics of a dosimeter
4. The role of the ionization chamber in irradiation dosimetry and its calibration protocols for clinical applications
5. Basis of detectors for dosimetry and microdosimetry

## Bibliography:

F H Attix, Introduction to radiological physics and radiation dosimetry
