di CATANIA

DIPARTIMENTO DI FISICA E ASTRONOMIA
“ETTORE MAJORANA”

DOTTORATO DI RICERCA IN FISICA
CICLO XXXIX A.A. 2023/2024

EXOPLANETS

2 CFU

Teaching staff: Isabella Pagano

Email: isabella.pagano@inaf.it

Office: INAF – Astrophysical Observatory of Catania

Telephone: +39 095 7332220

Reception hours: 11-12 a.m. from Monday to Friday by appointment

Program of the course:

1. **Introduction:** A general view of the field and the key questions
2. **Detection:** The different observations techniques: Radial Velocities, Imaging, Transits, Microlenses, Timing, Astrometry. Methods; challenges; Results to date.
3. **Census of exoplanets:** distribution in mass and size, multiplanetary systems; orbits, eccentricity, rotation, abundances. Host stars.
4. **Planetary formation theories:** Terrestrial planet formation, Giant planet formation, Tidal effects, Population synthesis, Orbital migration
5. **Exoplanet atmospheres:** Observation techniques; hot, warm and temperate planets. Transmission and emission spectroscopy. Phase curves. The concept of habitability. Results to date.
6. **Facilities for exoplanets:** Present and future facilities from ground to space.
